Surbiton, Surrey, England, KT6 7DY  
1975**

## **THE LAND RESOURCES DIVISION**

The Land Resources Division, part of the Ministry of Overseas Development assists developing countries in mapping, investigating and assessing land resources, and makes recommendations on the use of these resources for the development of agriculture, livestock husbandry and forestry; it also gives advice on related subjects to overseas governments and organisations, makes scientific personnel available for appointment abroad and provides lectures and training courses in the basic techniques of resource appraisal.

The Division works in close co-operation with government departments, research institutes, universities and international organisations concerned with land resources assessment and development planning.

## CONTENTS

Foreword	
Agriculture	1
Animal Science	5
Botany	19

Geoscience	63
Land Tenure	87
Maps	91
Miscellaneous	97
Natural Resources	109
Population	111
Soil Science	119
Water Resources	125

## FOREWORD

In conjunction with each project undertaken by the Land Resources Division, a Land Resource Bibliography is prepared. The bibliographical entries are made on edge punched cards and from these cards a typewritten list bibliography is prepared and issued to each member of the project team.

During the project the cards are continuously updated and the resultant bibliography is published at the completion of the project. The content of the bibliography is determined by the nature of the project. Each bibliography is divided into standard sections as follows:

<b>AGRICULTURE</b>	To exclude named crops, but to include weed and pest control in general
<b>ANIMAL SCIENCE</b>	To include fisheries and entomology
<b>BOTANY</b>	To exclude the botany and the ecology of forests and forest surveys
<b>CLIMATOLOGY</b>	
<b>CROP SCIENCE</b>	To include references to named crops only
<b>CULTURAL STUDIES</b>	To include history, politics, prehistory, anthropology, sociology, archaeology, linguistics, education and religion
<b>ECONOMICS</b>	To include trade, commerce, finance and broad regional development
<b>FORESTRY</b>	To include the botany and the ecology of forests and forest surveys
<b>GEOSCIENCE</b>	To include geology, geomorphology, physical geography, topography and general geography
<b>LAND TENURE</b>	To include land reform, legal aspects of land holding, holding size and property rights
<b>MAPS</b>	

## **MISCELLANEOUS**

To include medical science, services, transport, travel, communication, urban development, guidebooks, yearbooks, exploration, expeditions, descriptive writings and administration

## **NATURAL RESOURCES**

To include general surveys of environments, sea resources, land capability and land use, but not specialised surveys appropriate to the other sections

## **POPULATION**

To include demography, settlement patterns, population movement and censuses

## **SOIL SCIENCE**

## **WATER RESOURCES**

The techniques used and time available for the production of these bibliographies allows searching of UK sources only. Although every effort is made to obtain the most accurate entry for each item, some of the details of documents listed have been obtained from secondary sources only.

The documents listed in each bibliography include formally and informally published documents and also unpublished documents which are not necessarily accessible to the public.

## **LAND RESOURCE BIBLIOGRAPHY NO. 7**

The compilers would like to thank Mr J R F Hansell of the Land Resources Division for his considerable assistance in bringing to their notice documents for inclusion in this bibliography.

## LAND RESOURCE BIBLIOGRAPHIES

These publications have a restricted distribution and are not available to booksellers.

## OTHER PUBLICATIONS OF THE LAND RESOURCES DIVISION

These publications have a restricted distribution and are not available to booksellers. The Division makes a report on each completed project. The report is published as a *Land Resource Study* or *Technical Bulletin* only with the consent of the government concerned. The abbreviated titles of the reports in the style of the 'World List of Scientific Periodicals' are *Land Resour. Stud.* and *Tech. Bull. Land Resour. Div.*
